INFO:__main__:Agent result: {'question': 'What was the American response to the fall of the Berlin Wall?', 'context': ["When the Berlin Wall w
ent up , the initial response from John F . Kennedy's White House was as cautious as President Bush was when it began coming down 28 years lat
er . Kennedy was silent , Bush subdued . Kennedy faced a crisis that threatened Cold War explosion ; he had to worry about war . Bush seemed b
ent on playing down any celebration of victory for the West , lest the United States seem to be crowing . In both cases , the administrations
clearly were taken by surprise by abrupt moves on the Communist side , one adverse , one welcomed . Democrats have criticized Bush for what th
ey say is too timid a response now ; some Republicans complained in 1961 that Kennedy wasnot responding forcefully enough to a Soviet threat t
hat seemed to imperil western access to West Berlin . That access and the freedom of West Berlin _ not the wall _ wasthe issue that threatened
 major East - West confrontation . Aug . 13 , 1961 , was a brilliant midsummer Sunday at Hyannis Port , on Cape Cod , and Kennedy was headed f
or an afternoon cruise when word came that the Communists had sealed the border of East Berli nand started building a barbed - wire barricade
. He was briefed by his military and security aides , then resumed his weekend holiday and spent five hours cruising Nantucket Sound with his
family . His spokesman said there would be no comment on Berlin . Back at the White House the following week , Kennedy put U.S.forces on alert
 , ordered a partial callup of military reservists , and sent 1,500 soldiers to reinforce the U.S . garrison in West Berlin . He said later th
at the troops were hostage to America's intent to maintain access to West Berlin . While the United States denounced the border closing and th
e barricades that halted a flood of refugees and locked East Germans into their Communist state , the crisis centered on Soviet demand sand st
atements that seemed to threaten western highway and air routes to West Berlin , across 110 miles of East German territory . Kennedy sent Vice
 President Lyndon B . Johnson to West Berlin to declare that the United States would fight if necessary to defend freedom there , and to greet
 the troops , convoyed across East German territory without incident on Aug . 20 , 1961 . There were to be more Soviet threats to impede weste
rn access to Berlin , but it was not blocked . The wall became a symbol of oppression , Western protests a litany . It went up in 1961 because
 East Germans were fleeing their communist country , about 3,000 of them a day . It was reopened this month by an East German government seeki
ng to stem a new wave of refugees , and hoping that free travel would persuade many of them not to flee . From Kennedy's day to this , every A
merican president has challenged the Communists to tear down their wall . Bush did so in Mainz , West Germany , last spring . But when the bor
der was opened , Bush's response was bland and bureaucratic . It was as though he had decided to play it safe by playing it down , and overdid
 the role . He called the reopening a dramatic happening for freedom and said he was elated , although he didn't look it . ` ` I'm just not an
 emotional kind of a guy , ' ' he explained . In televised contrast came the indelible image of John F.Kennedy in West Berlin , calling the di
vided city a symbol of freedom everywhere , declaring in a Boston accent that he took pride in proclaiming ` ` Ich bin ein Berliner . ' ' That
 Kennedy speech was replayed again and again as the Berlin Wall came open . It was no tan early response to the wall . Kennedy delivered it on
 June 26,1963 , nearly two years after the Communists walled in East Berlin . In the days after the border was sealed in 1961 , the administra
tion accused the Soviet Union of cynically and irresponsibly sealing the eastern sector of Berlin in violation ofthe agreement among the World
 War II allies . ` ` I don't feel the situation in East Berlin is satisfactory in any way , ' ' Kennedy said at a news conference on Aug . 30
. ` ` And we have made clear that we have _ do not consider it satisfactory . ' ' Eloquence came later . Bush has said that he will be imagina
tive yet prudent in dealing with the new situation in the East . So far the emphasis has been on prudence . The administration has offered to
 help West Germany house and care for refugees . There have been no major policy moves . Senate Democratic Leader George Mitchell urged Bush to
 go to West Berlin to express American exhilaration . The White House said Bush has no such plans . Sen . Robert J . Dole of Kansas , the Repu
blican leader , complained about an ` ` increasing level of Democratic carping ' ' at Bush's actions and words on Eastern Europe . ` ` We have
 no apologies or concern with anything that we've do neat this point , ' ' said White House Press Secretary Marlin Fitzwater . ` ` I would sim
ply say that all the actions that we have taken thusfar . . . we believe have been appropriate , have not been offensive , and have had the de
sired effect of offering our support without inciting revolution or other actions that would take the process backwards . ' ' Walter R . Mears
 , vice president and columnist for The Associated Press , was covering President John F . Kennedy in Hyannis Port , Mass . , when the Berlin
wall was started .", "Former West German Chancellor Willy Brandt said Monday he hopes some of the crumbling Berlin Wall will stand permanently
 , not as a barrier but as a reminder of the Cold War . ` ` A part of it should be allowed to remain standing , to serve as something of a mus
eum , ' ' said Brandt , who was mayor of West Berlin when the wall was erected in 1961 . East German officials have opened new passages throug
h the wall but have made it clear they will leave much of it standing for no wto continue marking the line between East Berlin and West Berlin
 . Brandt , 75 , said he was deeply moved when he visited Berlin overthe weekend and watched people freely moving through _ and over _the wall
 . He said he would never forget how , for the first time , he saw East German border guards smiling at East German residents as they passed t
hrough border control points . ` ` They were so friendly . And the ( East ) Berliners who came back called over to the police _ ` Hey look , w
e're back ! ' ' ' Even though Brandt is from the northern city of Luebeck , there are few politicians in West Germany whose personal histories
 are so closely linked with the Berlin Wall . He rose to world prominence in 1961 when Communist East Germany constructed the wall , which bec
ame the scene of dozens of fatal escape attempts . Angered by the wall's deadly threat to East Berliners , Brandt immediately condemned the st
ructure as a human rights violation . In an interview shown Monday night on the Macneil - Lehrer NewsHour broadcast in New York , Brandt was r
eminded of his anger in 1961 when the three Western Allies _ America , Britain and France _ did nothing to tear the wall down and he was asked
 if President John F . Kennedy was right not to take action . ` ` ` I never asked President Kennedy to take military action , ' ' Brandt said .
` ` What I was angry about at the time . . . was thatthere had been so much talk about the four - power responsibility ( the Western Allies an
d Soviet Union ) for Berlin as a whole and when it came to a critical point , we had to acknowledge that four - power responsibility had to be
 reduced to a three - party responsibility for Western Berlin . ` ` I was happy that we could count on that protection _ responsibility and pr
otection . No , I think looking back at it , itwas the right thing not to take the kind of military action which could have brought us into a
new World War . ' ' Brandt said he thinks West Germany should not intervene in wha tis happening in East Germany but be ready to offer its hel
p . ` ` Leave it to people in the other part of Germany to find their proper answers to their problems , but be as helpful as possible , espec
ially in the field of economic cooperation , ' ' he said .", "Erich Honecker rose to power in East Germany after sealing a workers ' exodus to
 the West by building the Berlin Wallin 1961 . But his deaf ear to public cries for more democracy led toa second exodus , and he was through
. Honecker , 77 , was removed from leadership Wednesday after 18 years as Communist Party chief . He oversaw the building of socialism's stron
gest economy and a period of steadily improved relations with both East and West . But the short , bespectacled Communist failed to fall in st
ep with the new march of communism in Eastern Europe . The East Berlin government under Honecker defended China's bloody crackdown of the pro
- democracy movement in June , and violent clashes between security forces and demonstrators were reported in major East German cities during
and after Soviet President Mikhail S . Gorbachev's visit Oct . 6 - 7 to East Berlin . When tens of thousands took to the streets of Leipzig to
 dem andthe kinds of reforms sweeping Poland , Hungary and the Soviet Union , Honecker's state media branded them ` ` hooligans . ' ' More tha
n 53,000 others lost faith the system could be changed under Honecker or his hand - picked successor and fled to West Germany over the past tw
o months . Honecker's health was blamed for his departure . He is known tohave suffered complications from gallbladder surgery this past summe
r . West German intelligence reports said he has cancer . But his outmoded views of socialist dictates probably inflicted more damage than any
 illness . Under Honecker , East German border guards for years had order sto shoot anyone who tried to flee the country . At least 91 people
were shot to death after the Berlin Wall went up in 1961 to cut of fan escape route to the West . Honecker , born in what is now West Germany
, rejected all suggestions that the two Germanys be reunited . ` ` Socialism and capitalism can be no more united than fire and water , ' ' he
 commented during his historic visit to West Germany in 1987 . After rising to party leadership in 1971 , Honecker adopted a policy of toleran
ce toward the Protestant Church and pursued a brand of ` ` consumer socialism ' ' that gave his people the East bloc's most advanced standard
of living . However , the economy lags far behind that of West Germany and most Western nations . Unlike his Stalinist predecessor , Walter Ul
bricht , Honecker showed interest in detente and improved relations with West Germany . But his repression of political dissent , his role in
buildin gthe Berlin Wall and his maintenance of fortress - like borders with West Germany signaled the limits of moderation in East Germany .
Little is known of Honecker's personal life , except he divorced his first wife to marry Margot Feist , who now is education minister . Honeck
er was born Aug . 25 , 1912 , in Saarland , and joined a Communist youth group at age 14 . The Nazis imprisoned him in 1935 and he didn't get
out until the invading Soviet Red Army arrived a decade later . Honecker caught Ulbricht's eye in the fledgling postwar regime created in 1949
 in the Soviet occupation zone of the defeated Third Reich . In 1958 , he gained his first powerful government posts , rising to membership in
 the ruling Politburo and becoming a Central Committee secretary with responsibility for state security . In 1961 , Ulbricht assigned Honecker
 to direct construction ofthe Berlin Wall . As late as this year , Honecker said the wall would remain as long as the reasons for its construc
tion persist _ the loss of crucial labor capacity to the West ."], 'current_step': 'generate_answer', 'final_answer': "I don't know.", 'retrie

INFO:__main__:Agent result: {'question': 'How did the Iowa caucuses affect the New Hampshire primary?', 'context': ["New Hampshire primary watchers , always wary of threats to th
eir state's earliest - in - the - nation presidential primary , have turned their eyes westward toward the biggest - in - the - nation : California . Rich , hip and populated , C
alifornia is tired of having little say in the presidential nominating process because the nominees usually have been chosen long before Californians vote in June . Come January
, legislators in the delegate - loaded state will reconsider a proposal to move the state's primary to early March , shortly after New Hampshire's . Will California's 27 million
people mute New Hampshire's 1million ? Will its multiple media markets lure commentators'attention from the grass roots , person - to - person struggle here ? ` ` Absolutely not
. It will have just the opposite effect , ' ' said Robert Craig , a University of New Hampshire political analyst . ` ` All you have to do is ask yourself whether you'd like to b
e onthe cover of Time or Newsweek four days before the California primary . ' ' State Democratic Chairman Joseph Grandmaison and his Republican counterpart , Rhona Charbonneau ,
agree . ` ` We're a small , close state , ' ' Charbonneau said . ` ` The media will still be here . It's tradition . . . and maybe superstition . ' ' Since 1952 , no one has been
 elected president without winning New Hampshire . Supporters say New Hampshire's primary _ and , more recently , Iowa's party caucuses _ should come early because personal conta
ct sare more effective than sound bytes in small states . They say the grassroots campaigning that has catapulted long - shots to victory is impossible in a huge state like Calif
orni aor a regional primary like ` ` Super Tuesday ' ' in the South in 1988 . ` ` People make a mistake thinking that the only thing New Hampshire has going for it is its early d
ate , ' ' said Concord lawyer Thomas Rath , who ran Bob Dole's 1988 primary campaign in New Hampshire . He said the willingness of people in New Hampshire to get involved early ,
 their tightknit communities and the ` ` earned ' ' media exposure makes a victory worth billions in advertising in California . ` ` You can't break through in a state like Calif
ornia , ' ' Rath said . ` ` If you're a Jimmy Carter or a Bob Dole running against the quasi - incumbent figure , you need a place that's going to dent that front - runner's armo
r . George McGovern did it in 1972 and Gary Hart did it in 1984 . ' ' Robert Beckel , campaign manager for Democratic presidential nominee Walter Mondale in 1984 , also has said
a California switch would discourage long - shots and attract nationally well - known candidates . Democratic National Committee Chairman Ron Brown didn't go that far . But in a
recent visit to New Hampshire , he said the influence of New Hampshire and Iowa was ` ` grossly overrated ' ' and praised California's efforts to have its contest earlier . Becke
l maintains that having the option of scoring a major victory in California might make a candidate less inclined to sweat it out in Iowa and New Hampshire . Rath dismissed the no
tion that candidates would campaign in California on New Hampshire time . ` ` The week between the Iowa caucuses and the New Hampshire primary ( in 1988 ) was probably the politi
cal Super Bowl of all ti mein this state , ' ' he said . ` ` And California a week after won't change anything . ' ' New Hampshire , Rath said , ` ` is too riveted in the nation'
s political consciousness . ' ' Dayton Duncan , press secretary for Massachusetts Gov . Michael Dukakis in the latter part of his 1988 campaign and a top Mondale spokesman in 198
4 , agrees . ` ` Obviously , they'll have to spend a lot of time in California , but it's too big a state to campaign intensively the way you can in New Hampshire , ' ' he said .
` ` The best way for you to get a headstart in California is to do well in New Hampshire . ' ' Duncan said California and Super Tuesday are too big to organize at the grassroots
 level and too expensive to advertise in . The shortest route to becoming known is to win the caucuses and primaries before them , he said . Ron Kaufman , regional political dire
ctor for George Bush's 1988 campaign , said an early California primary will go much the same way as Super Tuesday . That was meant to diminish the impact of New Hampshire and Io
wa . But Kaufman , now a White House aide , said it had the opposite effect . ` ` The biggest single thing that helped Michael Dukakis in Super Tuesday was winning New Hampshire
, ' ' Kaufman said .", "Frustrated Democrats are considering asking Congress to help change the campaign calendar for the 1992 presidential election , possibly using a lottery to
 select early primary states and diminish the pitfalls of Iowa and New Hampshire . Among the state party leaders who met here this weekend , there was little sentiment for a whol
esale rewrite of delegate selection rules as the solution to the Democrats ' dismal showing in recent presidential elections . ` ` I'm going to tell you , everybody's damn tired
of rules changes , ' ' said Bob Slagle , the Texas state party chairman . ` ` And Ithink the average Democrat thinks we're absolutely insane if we ge tinto another big battle abo
ut rules . ' ' Said Slagle : ` ` They want us to worry about how we're going to win elections . ' ' The one change that has widespread support among party officials would be to a
lter the campaign calendar . The principal target wouldbe Iowa , which traditionally has begun the delegate selection process . To many Democrats , the Iowa caucuses are an exerc
ise in special - interest politics that pushes candidates into positions that leave them vulnerable to attack in the general election campaign . Having just suffered their fifth
defeat in the last six presidential elections , the Democrats are looking for ways to limit their vulnerabilities . Iowa and New Hampshire each have state laws that automatically
 move their caucuses and primary ahead of any other similar events . Until now , there has been no serious attempt to force those two small states to observe timetables set for o
ther states , which Iowa and New Hampshire have resisted . The solution now being debated is a federal law dealing with the timing of presidential primaries and caucuses . Gainin
g favor among Democrats is the idea of a lottery to determine the states that would lead off the process . Democratic National Chairman Paul G . Kirk Jr . , while emphasizing tha
t he was not endorsing the idea , said he thought there was merit in studying proposals for holding a lottery one year before the nominating conventions to choose two or more sma
ll states as site sfor the first primaries and caucuses . ` ` The candidates don't know what that state is , so they're not camping out , ' ' Kirk said . ` ` It shortens the cale
ndar . ' ' Camping out is exactly that candidates now do in Iowa . The very day that Kirk was speaking , Jesse Jackson was appearing in Iowa atthe convention of the Iowa Farm Uni
ty Coalition . ` ` Most Iowa Democrats expect there will be a debate about the Iowa caucuses , ' ' said Bonnie Campbell , that state's Democratic chairwoman . ` ` They are defens
ive because they like what we do . They also recognize there is not unanimity of opinion on that . ' ' In the end , ` ` it may well be that nothing happens , ' ' she said . ` ` I
 think if we survive , that will be why . ' ' Kirk also said he thought Super Tuesday , the date when most Southern states hold their primaries together , had not produced the ex
pected result of boosting a conservative presidential contender , and probably would be repeated even though it is ` ` too large and too dispersed . ' ' Super Tuesday's big winne
r was Jackson and the eventual nominee was Gov . Michael Dukakis of Massachusetts , who failed to carry asingle Southern state in the general election . Also talking about a lott
ery or some other federal move to shorten the delegate - selection process was former Arizona Gov . Bruce Babbitt , a short - lived contender for the Democratic nomination thisye
ar . Babbitt said a lottery would prevent candidates from knowing where the campaign would begin and would force them to address national rather than parochial issues . He blamed
 the Democrats ' string of presidential election defeat son a lack of understanding of what voters want from a president and candidates who campaign as if they were running for C
ongress . Babbitt said voters want presidential candidates who offer a clear vision of where they would take the economy and how they would handle defense and foreign policy conc
erns .", "Only a month ago , Bob Dole looked ready to wrest the Republican presidential nomination from George Bush . Now , he is desperately looking for ways to keep his White H
ouse hopes from being wiped out by Bush Bush in today's Illinois primary . In mid - February , everything was looking up for Dole . He had scored an upset win in the Iowa caucuse
s , and as the New Hampshire primary approached , polls were suggesting he could overtake the vice president in the state . But in one 48 - hour stretch _ the final two days befo
re the voting in New Hampshire _ the Dole campaign derailed , and has never gotten back on track . A combination of body blows _ weak organization , poor planning , a mean image
and just bad luck _ has reduced the formidable minority leader of the Senate to a battered , struggling candidate . With the vice president leading 2 - to - 1 in the Illinois pol
ls , the question Dole faces over and over is when _ not if _ he will withdraw . Dole said it will not be today or Wednesday : ` ` I've made a judgment that Illinois , whatever h
appens , we're going to keep going . ' ' From the start , Dole was judged a tough contender for the 1988 nomination . A seasoned politician with national stature , the Kansas sen
ator was one Republican who could match Bush in fund - raising , name recognition and experience . But there were doubts about Dole as well , doubts that all came to the surface
the weekend before the New Hampshire primary Feb . 16_ ` ` the 48 hours that cost them the campaign ' ' is how one Republican professional described those days . ` ` He was ready
 to put Bush away , ' ' said GOP pollster Lance Tarrance , who worked for former candidate Jack Kemp . Dole was riding the wave out of his big early win _ a triumph inthe Iowa ca
ucuses on Feb . 8 . Bush was a disappointing third behind former television evangelist Pat Robertson . That should have mean ta big boost for Dole for the New Hampshire primary t
he next week . ` ` You need some luck . . . and Dole didn't get much good luck out of Iowa , ' ' Tarrance said . ` ` The news of Robertson beating out Bush . . . was the big stor
y . ' ' Dole did start picking up strength in New Hampshire . Bush was down , and changing his style as his campaign struggled to recover . But by Thursday of that week , Bush wa
s on the counterattack , readying ads accusing Dole of ` ` straddling ' ' major issues . And the Dole campaign could not get its act together to respond . One television commerci
al attacking Bush _ called ` ` Footsteps ' ' inside the campaign _ was ready Thursday . But top aides viewed i tand judged it ` ` unusable ' ' because of poor production and prob
lem swith the script , said two sources who spoke on the condition they not be named . Dole tried twice that week to make a new spot , promising to veto any tax increases , but o
nce again aides judged it not usable , a top Dole adviser said , speaking on the condition of anonymity . When the new ads were ready late Friday , the Dole campaign couldn't get
 them on the air . The television stations were closing for the weekend , making it harder to switch the tapes at the stations . ` ` They couldn't get the old ads off the air and
 the new one son , ' ' said the GOP professional , who is not working for any campaign . ` ` That's what the campaign is supposed to be able to do. They didn't . ' ' Then it was
on to the South , where Bush rode President Reagan's popularity and his own solid organization to a wipeout win over Dole on Super Tuesday . Organizational problems have been a t
rademark of Dole campaigns from the start . The wily Senate operator was loath to delegate authority and had a penchant for snarling lines of authority , several Dole aides said
. Former Labor Secretary Bill Brock was brought into run the campaign on Nov . 1 , but that was probably too late . ` ` The Bush campaign has been working on strategy for years ,
 ' ' said the GOP pro . For example , the Bush campaign had prepared long and hard forthe possibility of an Iowa loss . In contrast , the Dole campaign found itself pumping up ex
pectations of a victory in New Hampshire , when even aides said the preferable course would have been to talk of how tough it would be to beat Bush in his own backyard . And afte
r the New Hampshire loss , the image of a mean Bob Dole came back to haunt him . He snapped at Bush in a television interview that Bush's ads were lying about Dole's record . The
 chaos in the final days of the New Hampshire campaign was eerily echoed in Illinois . Dole went into the state saying he had to win , then backed of fon that contention . He mad
e deep cutbacks in his staff , and let theword leak out before he made an explanation . He abruptly moved to pull ads off the air , giving rise to rumors he was throwing in the t
owel . To top it all off , his half - hour address to the voters of Illinois on Saturday night was hit by technical problems . ` ` He did it to himself , ' ' said GOP consultant
Eddie Mahe of Dole . ` ` The voters can't see any big differences between them onthe issues . What they did is make their decisions on personality and style . ' ' Mahe said the G
OP voters saw each man face defeat in a key early contest _ Bush in Iowa and Dole in New Hamsphire . And they liked what they saw in Bush more ."], 'current_step': 'generate_answ

Answer: The Iowa caucuses had a significant impact on the New Hampshire primary. A big win in the Iowa caucuses boosted Bob Dole's campaign, and he was riding the wave into New H
ampshire. However, the news of Pat Robertson beating out George Bush in Iowa was the big story, and Dole's momentum began to wane. By the time the New Hampshire primary approache
d, Bush was on the counterattack, readying ads accusing Dole of "straddling" major issues. The Dole campaign struggled to respond, and the final days of the campaign were marked
by chaos and poor organization. The Iowa caucuses ultimately hurt Dole's chances in New Hampshire, and he lost the primary to Bush. The loss was a significant blow to Dole's camp
aign, and it has raised questions about his ability to win the Republican nomination.

--------------------------------------------------
```

Task 1 analysis:

All three questions were asked using the same pipeline and dataset as described in the MP2 README. The apnews dataset used in this task was from the 1980s so questions are designed to have some relevance to that time period and therefore that dataset. On every run compression did not yield any docs, but the retriever was able to locate three relevant documents. When I asked the system “”what was the Soviet response to the Chernobyl nuclear disaster” and “how did the Iowa caucuses affect the New Hampshire primary” the model was able to closely follow the associated documents in order to answer appropriately. When I asked the system “What was the American response to the fall of the Berlin wall?” you are able to see in the context window an appropriate answer. Retrieved documents that claim president Bush’s response was cautious, bland, and bureaucratic. However, the model’s final answer after generation was “I don’t know”. I believe this is because the context applicable to the answer was mixed in with a large amount of other material on the Berlin wall and American responses, so the model elected to not use it. The model could not parse that the context was definitively associated with the fall of the Berlin wall.

Task 2:

Question 1:

3. Berlin Wallin 1961 . But his deaf ear to public cries for more democracy led toa second exodus , and he was through . Honecker , 77 , was removed from leadership Wednesday after 18 years as Communist Party chief . He oversaw the building of socialism's strongest economy and a period of steadily improved relations with both East and West . But the short , bespectacled Communist failed to fall in step with the new march of communism in Eastern Europe . The East Berlin government under Honecker defended ...

Answer
I don't have enough information to answer the question accurately. The context only discusses the initial response of John F. Kennedy's White House to the construction of the Berlin Wall in 1961 and later administrations' responses to its fall, but not the fall itself.

1. New Hampshire primary watchers , always wary of threats to their state's earliest - in - the - nation presidential primary , have turned the
ir eyes westward toward the biggest - in - the - nation : California . Rich , hip and populated , California is tired of having little say in t
he presidential nominating process because the nominees usually have been chosen long before Californians vote in June . Come January , legisla
tors in the delegate - loaded state will reconsider a proposal to move the ...

2. primary states and diminish the pitfalls of Iowa and New Hampshire . Among the state party leaders who met here this weekend , there was lit
tle sentiment for a wholesale rewrite of delegate selection rules as the solution to the Democrats ' dismal showing in recent presidential elec
tions . ` ` I'm going to tell you , everybody's damn tired of rules changes , ' ' said Bob Slagle , the Texas state party chairman . ` ` And It
hink the average Democrat thinks we're absolutely insane if we ge tinto another ...

3. primary . In mid - February , everything was looking up for Dole . He had scored an upset win in the Iowa caucuses , and as the New Hampshir
e primary approached , polls were suggesting he could overtake the vice president in the state . But in one 48 - hour stretch _ the final two d
ays before the voting in New Hampshire _ the Dole campaign derailed , and has never gotten back on track . A combination of body blows _ weak o
rganization , poor planning , a mean image and just bad luck _ has reduced ...

Answer
The Iowa caucuses did not directly affect the New Hampshire primary in terms of their timing. However, the Iowa caucuses were seen as a catalys
t for the media attention and public focus on New Hampshire, making it difficult for the Dole campaign to gain momentum. The Iowa loss was a se
tback for Dole, and the New Hampshire loss followed, leading to a perception of Dole's mean image. The media attention and focus on New Hampshi
re, which had already been present due to its early date, became more intense after the Iowa caucuses. The Dole campaign's poor performance in
Iowa and New Hampshire, combined with the media's focus on New Hampshire, ultimately hurt his chances in the campaign.

Task 2 analysis:

To accomplish this modification to the system's behavior, main.py was the only file that changed. Load config > build retriever > for the question in GraphState, call agent.invoke > print. Initially, the print loop logged the full text of every retrieved article in a dictionary and printed that out as the context. Those couple of lines in main() have been replaced with the call of a new function named print_result.

The key change in print_result is using the newly built make_snippet to lowercase the question > keep letter tokens longer than two characters > drop STOPWORDS > find the earliest whole word hit among the words that remain in a document > then take 500 characters from the hit. That happens for each of the three documents that were retrieved to build the context for the answer. When the system prints to host, a retrieved header with each of those snippets glazed in yellow is printed. After the retrieved block an answer block (which is the generated output from the model) is printed in green.

In the initial output of the system before any changes the context from the documents was very difficult to read for a human. It was a marker of evidence, but did not answer why the model answered the way that it did. This change distills that context down to a digestible block which can be used to understand why the model generated the answer that it did. The headings and color coding makes it very easy to distinguish between the two at a quick glance.

g the United States , the Soviet Union , France and Britain , signed a charter inaugurating the World Association of Nuclear Operators . Charte
r members represent about 115 of the 130 power companies that produce electricity ...

Answer
The Soviet response to the Chernobyl nuclear disaster was defensive, with officials strikingly worried that public opposition could halt develo
pment of nuclear power in the Soviet Union. They have opened an international media center at Chernobyl, given more than 180 tours of the plant
, and made other efforts to provide information about their efforts to clean up after the accident. However, they have also faced criticism fro
m the West for not immediately reporting the accident, and from Soviet citizens who fear radiation sickness and its effects on their health. Of
ficials have criticized American doctor Robert Gale and others who estimate the possible number of cancer deaths from the Chernobyl accident, a
ccusing them of spreading misinformation. The Soviet media have reported on the public's fear of nuclear power, and the government has taken st
eps to reassure the public and prevent the spread of misinformation. Despite the disaster, the Soviet Union has committed itself to an ambitiou
s nuclear power program. The government has also formed a new association, the World Association of Nuclear Operators, to share safety informat
ion and prevent future accidents.

orried that public opposition could halt development of nuclear power in the Soviet Union . The April 26 , 1986 , explosion and fire at the Che
rnobyl plant's No . 4 reactor killed at least 31 people and released a cloud ...

Answer
The Soviet government's response to the Chernobyl nuclear disaster was initially defensive and criticized by the press. They were accused of no
t immediately reporting the accident and of hiding information. The government opened an international media center at Chernobyl and provided t
ours of the plant, but this was seen as an attempt to control the narrative. The government acknowledged that rumors of radioactive leaks still
 existed, and some officials expressed concerns about "radio phobia" and its potential impact on nuclear power. The reports also noted that pub
lic opposition had halted construction of nuclear power plants near certain cities. The government maintained that there were no medical effect
s of the fire, despite estimates of cancer deaths from the accident. The reports suggested that the government was withholding information abou
t the full extent of the disaster and its impact on the public.

Task 3 analysis:
Questions under 200 characters still enter the original logic, where that behavior can be seen after the changes from task 2. If the question is over 200 characters or has multiple sentences, that question is still sent to the model. However, the model is directed to split the question into 2-4 lines and each separate line is a BM25 search over the dataset. This is the subquery. Each subquery returns a context to the model, the model performs a separate generation on the returned context to produce an answer. Those separate subquery answers are fused together using fuse_subqueries and then returned to the user. This is how we get the task 3 screenshots.
